## ABOUT

---

I am a beginner web developer who is passionate about his work.

I develop websites with minimal use of libraries, constantly monitor the technologies and study web development.

Took courses in IT Education Academy, learning HTML / CSS, also creating sites using acquired knowledge.

After completing the basic course, I started working with JavaScript, which included working with DOM, functions, arrays, objects, events, animations, prototypes.

Also, used ES6 to solve many tasks during the course.

Now I am looking for a job opportunity as a Junior Frontend developer.
